IDENTIFIERS *Delaware; *Performance Indicators

ABSTRACT

This guide to Delaware social studies standards for grades 9-12 is intended to help and support local school districts in their development of a standards-based curriculum. The guide cites four civics standards, providing end of cluster expectations (listing areas which will serve as the basis for student assessment) and performance indicators for several topics, according to grade level. It repeats this format for four geography standards, four economics standards, and four history standards. The guide's state standards, benchmarks, and performance indicators comprise a framework designed to identify themes, skills, and knowledge that the students of Delaware are expected to know in each of the four disciplines of the social studies. Each of the standards emphasizes a process of reasoning and skill development that requires schools to develop course content. The guide also contains a glossary of social studies terms. (BT)

Topical Pathways Grades 9-12 Social Studies

CIVICS	ECONOMICS	GEOGRAPHY	HISTORY
<p>Government Politics Citizenship Participation</p>	<p>Microeconomics Macroeconomics Economic Systems International Trade</p>	<p>Maps Environment Places Regions</p>	<p>Chronology Analysis Interpretation Content:</p> <ul style="list-style-type: none"> • U.S. History 1850 to the present • World History

CIVICS Standard One: Students will examine the structure and purposes of governments with specific emphasis on constitutional democracy.

End of Cluster Expectations

By the end of grade 11 students will be able to:

- analyze the ways in which the structure and purposes of different governments around the world reflect differing ideologies, cultures, values, and histories.

The areas listed above will serve as the basis for Social Studies assessment items in the Delaware Student Testing Program.

Performance Indicators Topic: Government

Grade Eight	High School Level
<p>Students will be able to:</p> <p>8.401 differentiate between the functions of federal, state and local governments. (U.S.)</p> <p>8.402 explain the purpose for the different organizational structures of each level of government. (local, state and federal)</p> <p>8.403 explain the advantages and disadvantages of democratic systems of government.</p>	<p>Students will be able to:</p> <p>C.401 describe the purposes and structures of democratic governments.</p> <p>C.402 describe the purposes and structures of authoritarian governments.</p> <p>C.403 analyze the influence that culture, values, and histories have in determining a nation's form of government.</p> <p>C.404 interpret how differing ideologies such as classical republicanism (e.g., common good) and classical liberalism (e.g., self interest) influence a nation's form of government.</p> <p>C.405 provide examples of how the principles of rule of law and rule of men are applied by governments.</p> <p>C.406 compare and contrast the purposes and structures of democratic and authoritarian types of governments.</p>

CIVICS Standard Two: Students will understand the principles and ideals underlying the American political system.

End of Cluster Expectations

By the end of grade 11 students will be able to:

- examine and analyze the extra-Constitutional role that political parties play in American politics.
- understand that the functioning of the government is a dynamic process which combines the formal balances of power incorporated in the Constitution with traditions, precedents, and interpretations which have evolved over the past 200 years.

The areas listed above will serve as the basis for Social Studies assessment items in the Delaware Student Testing Program.

Performance Indicators Topic: Politics

Grade Eight	High School Level
<p>Students will be able to:</p> <p>8.404 explain the principles and content of the Declaration of Independence, the United States Constitution (including the Bill of Rights), and the Federalist Papers.</p> <p>8.405 explain why the amendments to the United States Constitution are necessary to protect the rights of all citizens in a society based on majority rule.</p> <p>8.406 explain the basic principles of the juvenile justice system.</p> <p>8.407 describe the major differences between the due process rights of juveniles and adults (e.g., no right to a trial by jury, emphasis on rehabilitation, confidentiality).</p> <p>8.408 describe the discrepancies between American ideals and the realities of American social and political life (e.g., the ideal of equal opportunity and the reality of unfair discrimination).</p>	<p>Students will be able to:</p> <p>C.407 describe how and why political parties are created.</p> <p>C.408 explain the role political parties play in the U.S. political system.</p> <p>C.409 explain how political parties impact American politics.</p> <p>C.410 explain the formal balances of power contained in the U.S. Constitution.</p> <p>C.411 analyze how constitutional amendments change the U.S. Constitution.</p> <p>C.412 explain how court cases and judicial review affect the formal balances of power in our government.</p> <p>C.413 explain how the formal balance of power in our government evolves in response to acts, laws, traditions, and interpretations.</p> <p>C.414 explain how the government of the United States addresses the discrepancies between American ideals and the realities of American social and political life (e.g., the ideal of equal opportunity and the reality of unfair discrimination).</p> <p>C.415 explain the influence of racial, economic, regional, ethnic, or linguistic diversity on American politics.</p>

CIVICS Standard Three: Students will understand the responsibilities, rights, and privileges of United States citizens.

End of Cluster Expectations

By the end of grade 11 students will be able to:

- understand that citizens are individually responsible for keeping themselves informed about public policy issues on the local, state, and federal levels; participating in the civic process; and upholding the laws of the land.

The areas listed above will serve as the basis for Social Studies assessment items in the Delaware Student Testing Program.

Performance Indicators Topic: Citizenship

Grade Eight	High School Level
<p>Students will be able to:</p> <p>8.409 describe the various ways one can become a citizen of the U.S.</p> <p>8.410 explain how civil rights guarantee political freedom for United States citizens.</p> <p>8.411 explain how property rights guarantee economic freedom for United States citizens.</p> <p>8.412 tell why civil rights and property rights are protected in the United States.</p> <p>8.413 describe various responsibilities and privileges that come with United States citizenship.</p> <p>8.414 explain what is meant by the "Scope and Limits" of a right.</p> <p>8.415 take, evaluate and defend positions on contemporary issues.</p>	<p>Students will be able to:</p> <p>C.416 describe the citizen's responsibility to participate in the civic process.</p> <p>C.417 explain the benefits of participating in the civic process.</p> <p>C.418 explain the citizen's responsibility to uphold the laws of the land.</p> <p>C.419 select a current public policy issue (federal, state, or local) and develop an informed position.</p> <p>C.420 evaluate the influence of public opinion on public policy and the behavior of public officials.</p> <p>C.421 evaluate contemporary issues that involve a question of personal rights (e.g., restricted membership in an organization, school prayer, sexual harassment, refusal of medical care).</p>

CIVICS Standard Four: Students will develop and employ the civic skills necessary for effective, participatory citizenship.

End of Cluster Expectations

By the end of grade 11 students will be able to:

- develop and employ the skills necessary to work with government programs and agencies.
- understand the process of working within a political party, a commission engaged in examining public policy, or a citizen's group.

The areas listed above will serve as the basis for Social Studies assessment items in the Delaware Student Testing Program.

Performance Indicators Topic: Participation

Grade Eight	High School Level
<p>Students will be able to:</p> <p>8.416 utilize various mechanisms to communicate with elected officials.</p> <p>8.417 select and use sources of information to follow the political actions of elected officials.</p>	<p>Students will be able to:</p> <p>C.422 explain the various ways a citizen can participate in a political party.</p> <p>C.423 describe several ways of interacting effectively with government agencies.</p> <p>C.424 explain the role of voluntary associations (e.g., Habitat for Humanity, soup kitchens, The Red Cross), in performing functions that governments may otherwise have to provide.</p> <p>C.425 analyze the role of a commission or a citizen group in influencing public policy.</p>

ECONOMICS Standard One: Students will analyze the potential costs and benefits of personal economic choices in a market economy.

End of Cluster Expectations

By the end of grade 11 students will be able to:

- demonstrate how individual economic choices are made within the context of a market economy in which markets influence the production and distribution of goods and services.

The areas listed above will serve as the basis for Social Studies assessment items in the Delaware Student Testing Program.

Performance Indicators Topic: Microeconomics

Grade Eight	High School Level
<p>Students will be able to:</p> <p>8.418 explain how sellers compete on the basis of price, product quality, customer service, product design and variety, and advertising.</p> <p>8.419 explain how competition affects interactions of producers and consumers in a market economy.</p> <p>8.420 explain how technology impacts consumers and producers in a market economy.</p> <p>8.421 analyze a situation where the price and quantity of a good or service was altered by a change in supply or demand.</p>	<p>Students will be able to:</p> <p>E.401 develop a personal financial plan that includes a budget, an investment portfolio, and the appropriate use of credit.</p> <p>E.402 explain what causes a shift in supply or demand and its relationship to production and distribution within a market economy.</p> <p>E.403 analyze the potential costs and benefits of a decision made by a consumer, a business firm, or a government within a market economy.</p> <p>E.404 explain how government policies impact markets and influence individual choices of households, businesses and government.</p> <p>E.405 explain that to determine the best level of consumption of a product people must compare the additional benefits with the additional costs of consuming a little more or a little less.</p> <p>E.406 explain how the choices made by individuals, firms, or government officials in the short run often have long-run unintended consequences that can partially or entirely off set the initial effects of their decisions</p> <p>E.407 explain how government enforced price ceilings and price floors distort price signals and incentives to producers and consumers causing inefficient use of resources.</p> <p>E.408 explain the roles of government in a market economy and analyze the impact on consumers and producers.</p>

ECONOMICS Standard Two: Students will examine the interaction of individuals, families, communities, businesses, and governments in a market economy.

End of Cluster Expectations

By the end of grade 11 students will be able to:

- develop an understanding of how economies function as a whole, including the causes and effects of inflation, unemployment, business cycles, and monetary and fiscal policies.

The areas listed above will serve as the basis for Social Studies assessment items in the Delaware Student Testing Program.

Performance Indicators Topic: Macroeconomics

Grade Eight	High School Level
<p>Students will be able to:</p> <p>8.422 explain how the roles of households, businesses, and government in a market economy are interrelated.</p> <p>8.423 explain the services banking provides for households, businesses, and government.</p> <p>8.424 explain the effects that government taxes and spending have on a market economy.</p> <p>8.425 explain the impact of inflation on various groups of people such as those with fixed income, savers, and borrowers.</p>	<p>Students will be able to:</p> <p>E.409 explain the causes and effects of fluctuations in the business cycle in a market economy.</p> <p>E.410 explain the causes (demand-side/supply-side) and effects of inflation.</p> <p>E.411 explain the causes and effects of unemployment.</p> <p>E.412 explain the purposes and functions of fiscal policy.</p> <p>E.413 explain how a society's use of its resource base impacts its economic growth as measured by GDP or GNP.</p> <p>E.414 assess the state of an economy using economic indicators such as GDP/GNP, CPI, and unemployment and inflation rates.</p> <p>E.415 analyze the impact of monetary and fiscal policies on the state of the economy as measured by such economic indicators as GDP/GNP, CPI, and employment and inflation rates.</p> <p>E.416 explain the goals and function of monetary policy.</p> <p>E.417 explain how monetary and fiscal policies influence activity in a market economy.</p>

ECONOMICS Standard Three: Students will understand different types of economic systems and how they change.

End of Cluster Expectations

By the end of grade 11 students will be able to:

- analyze the wide range of opportunities and consequences resulting from the current transitions from command to market economies in many countries.

The areas listed above will serve as the basis for Social Studies assessment items in the Delaware Student Testing Program.

Performance Indicators Topic: Economic Systems

Grade Eight	High School Level
<p>Students will be able to:</p> <p>8.426 compare and contrast different economies and describe how cultural values, resources, and technologies influence production, distribution, and exchange.</p>	<p>Students will be able to:</p> <p>E.418 define command, market, traditional, and mixed economies.</p> <p>E.419 analyze how economic goals (equity, efficiency, freedom, growth, security, and stability) influence the way in which a society answers the three basic economic questions.</p> <p>E.420 describe the advantages and disadvantages of command, market, traditional, mixed economies.</p> <p>E.421 analyze the opportunities and consequences that may result in the change from one type of an economic system to another.</p> <p>E.422 analyze how the role of government policies may affect the transition from one type of an economic system to another.</p>

ECONOMICS Standard Four: Students will examine the patterns and results of international trade.

End of Cluster Expectations

By the end of grade 11 students will be able to:

- analyze and interpret the influence of the distribution of the world's resources, political stability, national efforts to encourage or discourage trade, and the flow of investment on patterns of international trade.

The areas listed above will serve as the basis for Social Studies assessment items in the Delaware Student Testing Program.

Performance Indicators Topic: International Trade

Grade Eight	High School Level
<p>Students will be able to:</p> <p>8.427 evaluate the impact of government policies in promoting or restricting international trade on workers, producers, consumers and government.</p>	<p>Students will be able to:</p> <p>E.423 explain the effect of the distribution of the world's resources on international trading patterns.</p> <p>E.424 analyze how specialization influences patterns of international trade.</p> <p>E.425 explain the relationship between political stability and international trade.</p> <p>E.426 explain how international trade influences a nation's standard of living.</p> <p>E.427 explain how a nation's use of its resources (capital, natural, and human) in the production process affects both what it exports and imports.</p> <p>E.428 analyze the impact of national and international efforts to encourage and discourage international trade.</p> <p>E.429 explain what determines the flow of investment (real interest rates, exchange rates, real income, price levels) between trading partners.</p>

GEOGRAPHY Standard One: Students will develop a personal geographic framework, or “mental map,” and understand the uses of maps and other geo-graphics.

End of Cluster Expectations

By the end of grade 11 students will be able to:

- identify geographic patterns which emerge when collected data is mapped, and analyze mapped patterns through the application of such common geographic principles as
 - Hierarchy (patterns at a detailed scale may be related to patterns at a more general scale)
 - Accessibility (how easily one place can be reached from another)
 - Diffusion (how people or things move in certain directions at certain speeds)
 - Complementarity (the mutual exchange of people or goods among places usually occurs over the shortest possible distances)
- apply the analysis of mapped patterns to the solution of problems.

The areas listed above will serve as the basis for Social Studies assessment items in the Delaware Student Testing Program.

Performance Indicators Topic: Maps

Grade Eight	High School Level
<p>Students will be able to:</p> <p>8.428 construct from memory a sketch map of the world that places in the correct location relative to each other the major physical features (e.g. continents, oceans, major mountain ranges, significant deserts and river systems) and important human features (e.g. major cities of the area studies, significant countries and sub-regions, Prime Meridian, Equator, Tropics, and Polar parallels).</p> <p>8.429 associate major resources with specific geographic regions of the world.</p> <p>8.430 use various geographics including climographs to gather, interpret, and apply geographic information to solve problems.</p> <p>8.431 describe the uses of GPS (Global Positioning System) and GIS (Geographic Information Systems) locational technology.</p>	<p>Students will be able to:</p> <p>G.401 interpret thematically mapped information and draw inferences from spatial patterns using a combination of common geographic principles.</p> <p>G.402 demonstrate an understanding and application of the following common geographic principles:</p> <ul style="list-style-type: none"> > Hierarchy – patterns at one scale are related to patterns at a more general scale (e.g. economic or cultural connections between political units such as village, town, city, county, state and country; connections between political structures such as precinct, ward, county, state and nation). > Accessibility – the ease or difficulty of reaching all places from a given location (e.g. locating an auto parts distribution company near a regional trucking facility; North Carolina's furniture industry located close to forest resources and an East Coast market; changing shipping routes with the opening of the Suez canal). > Diffusion – the paths followed by people, information, or things as they spread over geographic space (e.g. the spread of the bubonic plague or AIDS in the world; the spread of tobacco consumption from North America to Europe, Asia and Africa). > Complementarity – the basis for an exchange of people or goods between two places, usually over the shortest distances (e.g. basis for trade between Northern and Southern Europe; trade between Europe, Africa, and North America before the Civil War).

Performance Indicators (Cont'd)

Topic: Maps

Students will be able to:	
G.403	explain how GPS (Global Positioning System) and GIS (Geographic Information System) are used to gather, portray and analyze data in thematic map form.
G.404	select the correct type of data to collect when presented with a problem, and show how it can be mapped and the mapped patterns analyzed to solve the problem (e.g. use maps to prepare an evacuation plan for low-lying islands threatened by hurricanes, to select the best site for a sanitary landfill in an urban region, or to evaluate the loss of water supplies over time as suburban development has built over aquifer recharge areas).

GEOGRAPHY Standard Two: Students will develop a knowledge of the ways humans modify and respond to the natural environment.

End of Cluster Expectations

By the end of grade 11 students will be able to:

- understand the Earth's physical environment as a set of interconnected systems (ecosystems) and the ways humans have perceived, reacted to, and changed environments at local to global scales.

The areas listed above will serve as the basis for Social Studies assessment items in the Delaware Student Testing Program.

Performance Indicators Topic: Environment

Grade Eight	High School Level
<p>Students will be able to:</p> <p>8.432 demonstrate understanding of the major processes that produce distinctive patterns of landforms, climate, and vegetation across the world.</p> <p>8.433 explain how human activity is affected by differences of landforms, vegetation and climate.</p> <p>8.434 explain how humans can make modifications to physical systems (e.g. global warming, deforestation, desertification).</p>	<p>Students will be able to:</p> <p>G.405 understand the components of the Earth's physical systems (hydrosphere, atmosphere, lithosphere, biosphere) as interconnected ecosystems (e.g. water cycle, nitrogen cycle, ocean/atmosphere interactions).</p> <p>G.406 recognize and explain the impact of human actions in changing ecosystems (e.g. acid rain, global warming, coastal dune destruction, mosquito control) at local to global scales.</p> <p>G.407 recognize and explain the role human action plays in intensifying the impact of ecosystems on society (e.g. effect of overgrazing on soil erosion, building in flood plains, contributing to air pollution, deforestation).</p> <p>G.408 identify ways that natural hazards and disasters affect human society (e.g. hurricanes, floods, droughts, earthquakes, volcanic eruptions).</p> <p>G.409 understand how humans perceive and respond to natural hazards and evaluate resource opportunities.</p>

GEOGRAPHY Standard Three: Students will develop an understanding of the diversity of human culture and the unique nature of places.

End of Cluster Expectations

By the end of grade 11 students will be able to:

- understand the processes which result in distinctive cultures, economic activity, and settlement form in particular locations across the world.

The areas listed above will serve as the basis for Social Studies assessment items in the Delaware Student Testing Program.

Performance Indicators Topic: Places

Grade Eight	High School Level
<p>Students will be able to:</p> <p>8.435 identify the different areas of the world where major religions, languages and political systems are found.</p> <p>8.436 demonstrate an understanding of the process that causes culture to spread from its origin to other places.</p> <p>8.437 use the concept of core and periphery to demonstrate that the influence of a culture decreases with distance from the cultural hearth or center (e.g. Mecca as the center of Islam).</p>	<p>Students will be able to:</p> <p>G.410 explain how different cultural values shape the character of particular places (e.g. contrast in lives of women between Bedouin and Scandinavian cultures).</p> <p>G.411 identify ways in which the convergence and divergence of cultures affect the characteristics of places (e.g. spread of English language; or expansion of Protestant religion in predominantly Catholic Latin America).</p> <p>G.412 explain how patterns of emigration and immigration shape the character of places (e.g. growth of Hispanic population in Delaware, especially Sussex County).</p> <p>G.413 analyze and evaluate the forces that make some places more attractive for economic activity than competing places.</p> <p>G.414 identify the ways that resource allocation and use can influence the pattern of settlements (e.g. regulation of water use, access to power generation, distribution of mineral deposits).</p> <p>G.415 understand the global interdependence of places.</p> <p>G.416 identify the ways that the internal structure of metropolitan areas differ in developed and developing countries (e.g. contrasts between North American, Latin American, African and Asian cities).</p> <p>G.417 explain the different ways people view a place, based on their stage of life, gender, social class, ethnicity and values and belief systems.</p>

GEOGRAPHY Standard Four: Students will develop an understanding of the character and use of regions and the connections between and among them.

End of Cluster Expectations

By the end of grade 11 students will be able to:

- apply knowledge of the types of regions and methods of drawing boundaries to interpret the Earth's changing complexity.

The areas listed above will serve as the basis for Social Studies assessment items in the Delaware Student Testing Program.

Performance Indicators

Topic: Regions

Grade Eight	High School Level
<p>Students will be able to:</p> <p>8.438 identify factors that may lead to specialization of a world region in one type of economic activity.</p> <p>8.439 explain how the changing location of economic activities and patterns of land use can be influenced by advances in technology.</p> <p>8.440 explain why some cultures are culturally and economically connected while others are not.</p> <p>8.441 explain how conflict and cooperation results in the division of the earth into political and cultural regions.</p> <p>8.442 apply a knowledge of how regional boundaries are established to explain the past or present borders of a regions.</p>	<p>Students will be able to:</p> <p>G.418 construct regions from a given geographical data set (e.g. regions based on agriculture, climate, vegetation, landforms, social class, ethnicity, life stages).</p> <p>G.419 identify how regions change over time as a consequence of human actions and environmental change (e.g. migration, technological change, capital investment, climate shifts, seismic activity).</p> <p>G.420 recognize different types of regions (e.g. formal, functional – including core and periphery, perceptual).</p> <p>G.421 identify the advantages and disadvantages of using human and physical features to delineate the boundaries of regions (e.g. mountain chains, rivers, lines of latitude and longitude, roads and railroad lines).</p> <p>G.422 explain how human conflict and cooperation can affect, and be influenced by, the location of regional boundaries (e.g. boundary conflicts between countries such as North and South Korea, or the internationalization of rivers such as the Rhine).</p> <p>G.423 explain how the division of the Earth into regions at several scales produce advantages and disadvantages for human societies (e.g. access to participation in the European Union, or the lack of a political homeland for the Kurdish peoples and their division among Iraq, Iran, Syria, and Turkey).</p>

HISTORY Standard One: Students will employ chronological concepts in analyzing historical phenomena.

End of Cluster Expectations

By the end of grade 11 students will be able to:

- analyze historical materials to trace the development of an idea or trend across space or over a prolonged period of time in order to explain patterns of historical continuity and change.

The areas listed above will serve as the basis for Social Studies assessment items in the Delaware Student Testing Program.

Performance Indicators

Topic: Chronology

Grade Eight	High School Level
<p>Students will be able to:</p> <p>8.443 analyze changes over time to regions, societies, and themes using historical materials.</p> <p>8.444 describe and support cause/effect relationships within a region, society or theme using historical materials.</p>	<p>Students will be able to:</p> <p>H.401 identify and describe a concept or trend within a set of historical materials.</p> <p>H.402 trace a trend or concept over time within a set of historical materials.</p> <p>H.403 analyze a set of historical materials to explain patterns of continuity and change related to a concept or trend over time.</p>

HISTORY Standard Two: Students will gather, examine, and analyze historical data.

End of Cluster Expectations

By the end of grade 11 students will be able to:

- develop and implement effective research strategies for investigating a given historical topic.
- examine and analyze primary and secondary sources in order to differentiate between historical facts and historical interpretations.

The areas listed above will serve as the basis for Social Studies assessment items in the Delaware Student Testing Program.

Performance Indicators Topic: Analysis

Grade Eight	High School Level
<p>Students will be able to:</p> <p>8.445 design and implement strategies for locating historical materials on a specific topic.</p> <p>8.446 judge the credibility of historical materials based on purpose, perspective, or point of view.</p>	<p>Students will be able to:</p> <p>H.404 design an effective strategy to research a historical topic using both primary and secondary sources.</p> <p>H.405 research a historical topic using both primary and secondary sources.</p> <p>H.406 distinguish between historical facts and historical interpretations in both primary and secondary sources.</p>

HISTORY Standard Three: Students will interpret historical data.

End of Cluster Expectations

By the end of grade 11 students will be able to:

- compare competing historical narratives, by contrasting different historians' choice of questions, use and choice of sources, perspectives, beliefs, and points of view, in order to demonstrate how these factors contribute to different interpretations.

The areas listed above will serve as the basis for Social Studies assessment items in the Delaware Student Testing Program.

Performance Indicators

Topic: Interpretation

Grade Eight	High School Level
<p>Students will be able to:</p> <p>8.447 conclude how several historians' descriptions of a society may differ.</p>	<p>Students will be able to:</p> <p>H.407 identify the factors that influence a historian's point of view (e.g., choice of questions, sources, perspectives, beliefs, and frame of reference).</p> <p>H.408 create and support their own interpretation of a historical event.</p> <p>H.409 compare and contrast several interpretations of the same historical event.</p>

HISTORY Standard Four: Students will develop historical knowledge of major events and phenomena in world, United States, and Delaware history.

End of Cluster Expectations

By the end of grade 11 students will be able to:

- develop an understanding of modern United States history, its connections to both Delaware and world history, including:
 - Civil War and Reconstruction (1850-1877)
 - Development of an industrialized nation (1870-1900)
 - Emergence of modern America (1890-1930)
 - Great Depression and World War II (1929-1945)
 - Postwar United States (1945-early 1970s)
 - Contemporary United States (1968-present)
- develop an understanding of recent and modern world history and its connections to United States history, including:
 - Explorations, contact, and interactions across the world (1450-1770)
 - Revolutions, ideologies, and technological change (1750-1914)
 - The 20th Century world (1900-present)

The areas listed above will serve as the basis for Social Studies assessment items in the Delaware Student Testing Program.

Performance Indicators **Topic: Content – U.S. History**

Grade Eight	High School Level
<p>Students will be able to:</p> <p>8.448 identify and describe major people and events in American History to 1877, and assess their significance to the nation's development.</p> <p>8.449 identify and explain the impact of major political, social, and economic trends in American History to 1877 and connections to Delaware History.</p> <p>8.450 identify and describe major technological advances in American History to 1877, and assess their significance to the nation's development.</p>	<p>Students will be able to:</p> <p>H.410 identify and describe major people and events in U.S. history since 1850 and their significance to the nation's development.</p> <p>H.411 identify and explain the impact of major political, social, geographic, technological, and economic trends in U.S. history since 1850 and their connections to Delaware history.</p>

Performance Indicators (Cont'd)

Topic: Content – U.S. History

Grade Eight	High School Level
	<p>Students will be able to:</p> <p><u>Civil War and Reconstruction (1850-1877)</u></p> <p>Explain the growing controversy over the expansion of African slavery into western territories, including the significance of:</p> <ul style="list-style-type: none"> A. Fugitive slave laws B. Dredd Scott decision C. Harriet Beecher Stowe and <u>Uncle Tom's Cabin</u> D. John Brown and "Bleeding Kansas" E. Popular sovereignty (Kansas-Nebraska Act) <p>Describe the election of 1860 and the secession crisis of 1861, relating them to previous trends and later events, including the significance of:</p> <ul style="list-style-type: none"> A. Growth of the Republican Party B. Lincoln-Douglas debates C. Fort Sumter <p>Explain the importance of major events and people during the Civil War, including:</p> <ul style="list-style-type: none"> A. Abraham Lincoln B. Emancipation Proclamation C. Battles of Gettysburg, Vicksburg, and Appomattox D. Conscription E. African-American soldiers (54th Massachusetts) F. Ulysses S. Grant <p>Discuss the major challenges of the Reconstruction era, including the significance of:</p> <ul style="list-style-type: none"> A. Civic rights amendments to the Constitution (13th, 14th, 15th) B. Freedman's Bureau

How population explosion and changes in the earth's environment altered conditions of life B. The increasing interdependence of human society C. How ideologies of democracy, private enterprise, and human rights have reshaped political and social life

Educational reform in Delaware is standards-based reform. The state standards, benchmarks, and performance indicators comprise a framework designed to identify themes, skills, and knowledge that the students of Delaware's high schools are expected to know in each of the four disciplines of the social studies. Each of the standards emphasizes a process of reasoning and skill development that requires schools to develop course content. While curriculum models have been offered as suggestions, each school district shall determine its own course designs, scope, and sequence to achieve student success.

GLOSSARY OF TERMS

Social Studies Performance Indicators Grades 9-12

describe this kind of inflation. Too many dollars means that the total demand in the economy is too high. Too few goods means that the total supply in the economy is too low in relation to that demand.

A

Authoritarian - a government which concentrates its power in a leader or an elite not constitutionally responsible to the people.

B

Balance of Power - the division of power among the executive, legislative, and judicial branches of the government.

Business Cycle - the fluctuation in the general level of economic activity as measured by such variables as the rate of unemployment and inflation and changes in real GDP is referred to as a business cycle.

C

Commission - a government agency having administrative, legislative, or judicial powers.

Competition - a marketplace situation in which no single seller is important enough to have any appreciable influence over price where the seller is a price taker.

D

Demand Side Causes of Inflation - inflation caused by increases in aggregate demand not matched by increases in aggregate supply. The phrase "too many dollars chasing too few goods" is often used to

E

Ecosystem - a system formed by the interaction of all living organisms (plants, animals, and humans) with each other and with the physical and chemical factors of the environment in which they live.

F

Fiscal Policy - consists of changes in taxes, in government expenditures on goods and services, and in transfer payments that are designed to affect the level of aggregate demand in the economy.

G

Geographic Patterns - patterns of the locational distribution of human or natural phenomena across a part of the earth's surface, usually discernable from a map.

Geo-graphics - various forms of media that convey the location of places or information, typically maps, aerial photos, satellite images, and graphs.

Glossary of Terms (continued)

Geographic Trends - trends in history that are influenced by or illustrated by geographic forces, such as the decrease in travel time expanding the potential market of a product like Florida oranges or the Appalachian Mountains blocking westward expansion.

Government Agencies - administrative divisions of local, state, or national governments.

H

Historical Interpretations - the act of interpreting historical sources that takes place when an individual writing about a topic, person, or event in history selects certain facts to emphasize and organizes those facts around a concept. All history is an interpretation by historians who bring to their research and writing their own frame of reference or set of perceptions and experiences through which they view the world and people. A historian interprets by:

- not having all the information
- reflecting a disproportionate point of view of the educated upper classes
- not being able to learn everything about an event or period
- selecting certain material over others
- by presenting history in a certain way
- by having a prior agenda

I

Interpretations - the authority of the courts to examine legislative or executive actions to determine whether they are constitutional.

Investment Portfolio - a portfolio is a selection of investments used to produce an income or return. A portfolio can be financial, as in a stock portfolio, or personal, as in investments in human capital. Investment means the putting to use of money, capital, or time in the hope of getting a profitable return.

L

Location - the position of a point on the surface of the Earth expressed by means of a grid (mathematical) or in relation (relative) to the position of other places.

M

Mental Map - a map which represents the mental image a person has of an area, including knowledge of features and spatial relationships as well as the individual's perceptions and attitudes regarding the place.

Monetary Policies - decisions by the Federal Reserve System that lead to changes in the supply of money and the availability of credit. Changes in the money supply can influence overall levels of spending, employment, and prices in the economy by inducing changes in the interest rates charged for credit and by affecting the levels of personal and business investment spending.

N

Natural Environment Occurrences - natural events such as hurricanes, tornadoes, earthquakes, and volcanic eruptions that have a major impact on human society.

P

Places - locations having distinctive characteristics that give them meaning and character and distinguish them from other locations.

Primary Resource - a source that gives a firsthand account or a direct record of an event or person being studied, most often recorded by a person who was there at the time and witnessed the event. There are different kinds of primary evidence: for example, letters, diaries, films and videos of an event.

Glossary of Terms (continued)

Public Policy - a plan or course of action made or followed by a government.

R

Region - an area with one or more common characteristics or features which gives it a measure of unity and makes it different from the surrounding areas.

S

Secondary Sources - a source that is a record or secondhand account of an event or person of the past recorded a long time after it happened by a person who was not there at the time.

Specialization - occurs when an economic unit (individuals, business firms, cities, regions, or countries) produces a narrower range of goods and services than it consumes. Countries normally specialize in the production of those goods and services they are best fitted to produce, given their particular endowment of productive resources. They then sell most of what they produce to people living elsewhere, and buy whatever else they need from other countries.

Supply Side Cause of Inflation - cost-push inflation is a rise in the general level of prices that is caused by increased costs of making and selling goods. Cost-push inflation does not result from pressures on demand. Instead, the pressures are on the supply side (increase in the cost of the factors of production).
